Application/Control Number: 10/767,307

Art Unit: 1761

The information disclosure statement filed January 30, 2004 fails to comply with 37 CFR 1.98(a)(2), which requires a legible copy of each cited foreign patent document; each non-patent literature publication or that portion which caused it to be listed; and all other information or that portion which caused it to be listed. It has been placed in the application file, but the information referred to therein has not been considered. Applicant has not supplied copies of the non-patent literature.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 6-8, 13-15, and 19 are rejected under 35 U.S.C. 102(b) as being anticipated by Etheridge et al (J Fd. Sc).

Etheridge et al (J Fd. Sc) teach a protein isolate prepared by from plasma comprising treating plasma with sodium hexametaphosphate at a pH of 4.4 to obtain a precipitate protein and a supernatant as is claimed (see entire document).

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Application/Control Number: 10/767,307

Art Unit: 1761

7

Claims 1-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Etheridge et al (J Fd. Sc) in view of Al-Machiki et al (US 4849241) and Weaver et al (US 2004/009640).

Etheridge et al (J Fd. Sc) teach a protein isolate prepared by from plasma comprising treating plasma with sodium hexametaphosphate at a pH of 4.4 to obtain a precipitate protein and a supernatant (see entire document).

The claims differ as to the use of the supernatant (i.e. liquid).

Al-Machiki et al (US 4849241) disclose a process for retaining immunoglobulins in whey which comprises treating whey with sodium hexametaphosphate at a pH of from about 3.8 to 4.7, wherein the immunoglobulins are in the supernatant (see entire patent, especially claims 1 and 6

Weaver et al (US 2004/009640) disclose the production of globulin fraction from plasma comprising treatment of plasma with a hexametaphosphate to obtain a globulin fraction wherein the fraction is filtered (see entire document, especially the flow diagram on pages 6-7).

It would have been obvious to a person of ordinary skill in the art, at the time the invention was made, to use the supernatant as taught by Al-Machiki et al (US 4849241) and Weaver et al (US 2004/009640) in that of Etheridge et al because the extraction and use of immunoglobulins as an immunity agent is conventional in the art. Applicant is using known components to obtain no more than expected results.

Su et al (J. Dairy Sci) is cited as of interest.

Application/Control Number: 10/767,307

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Leslie Wong whose telephone number is 571-272-1411.

The examiner can normally be reached on Tuesday-Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Milton Cano can be reached on 571-272-1398. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
